

Kushan Chamikara

AI & Data Science Undergraduate | Full-Stack Developer | Web3 Enthusiast

kushan.s.chamikara@gmail.com | +94 701 051 551 | github.com/devFelina

[Portfolio](#) | linkedin.com/in/Kushan Chamikara | Galle, Sri Lanka

PROFILE

Third-year AI & Data Science undergraduate (CGPA 3.48/4.00) at SLIIT, seeking a Data Science or AI internship to apply hands-on experience in machine learning, NLP, and full-stack development. Demonstrated ability to build and deploy end-to-end AI systems, from data preprocessing to production web interfaces. Active contributor to Web3 ecosystems and member of IEEE and ISEC.

EDUCATION

BSc (Hons) Information Technology – Specializing in Artificial Intelligence 2024 – 2028

Sri Lanka Institute of Information Technology (SLIIT) | CGPA: 3.48 / 4.00 (up to 2nd Year)

Mahinda College, Galle 2008 – 2021

PROJECTS

AI Car Price Predictor System Feb 2026 – Mar 2026

Tech: Python, Scikit-learn, Random Forest, Flask, Pandas, NumPy, MongoDB, JavaScript

- Trained a Random Forest Regression model (v7) achieving $R^2 = 0.926$ on vehicle pricing prediction using historical market data.
- Built a full-stack web application with a Flask backend and JavaScript frontend enabling real-time price prediction.

AI Email Summarization & Classification System Mar 2026

Tech: Python, TensorFlow, T5 Transformer, Flask, NLP, MongoDB, Google APIs, JavaScript

- Implemented a T5 Transformer model to auto-summarize incoming emails, reducing manual reading time significantly.
- Designed a multi-class classification engine to categorize emails into 7 categories (OTP, Finance, Job, Spam, etc.), improving inbox prioritization.
- Integrated Google APIs for real-time email retrieval and processing via a Flask backend.

AI Branch Cards – Chrome Extension Apr 2026

Tech: JavaScript (Vanilla), Chrome Extension API (Manifest V3), Python, Flask, OpenAI API

- Developed a Chrome Extension that generates AI-powered summary cards from selected text using OpenAI API.
- Built a lightweight Flask backend for context-aware insight generation, paired with a glassmorphism-styled frontend.

Blockchain Implementation System Apr 2026

Tech: Python, JavaScript, Flask, SHA-256, Cryptography libraries

- Built a proof-of-concept decentralized ledger implementing blocks, hashing (SHA-256), chain validation, and tamper detection.
- Demonstrated core blockchain principles — immutability, decentralization, and transparency — in a working simulation.

Car Dealership Management System Feb 2026 – Mar 2026

Tech: MongoDB, Express.js, React, Node.js (MERN Stack), Bootstrap

- Built a full-stack MERN application for vehicle listings, customer management, and inventory tracking with RESTful APIs.
- Developed a React frontend with Bootstrap for a responsive UI and an Express/Node.js backend for secure data operations.

Home Tutor Management System

May 2025

Tech: Java, Spring Boot, MySQL, HTML, CSS, JavaScript, Bootstrap, IntelliJ IDEA

- Developed a platform connecting students and tutors with registration, scheduling, and class management features.
- Managed relational database design in MySQL and implemented RESTful APIs for all system operations.

TECHNICAL SKILLS

Languages	Python, Java, JavaScript, C
ML / AI Preprocessing	Scikit-learn, TensorFlow, T5 Transformer, NLP, Random Forest, XGBoost, OpenAI API, Data
Web / Backend	Flask, Spring Boot, Node.js, RESTful APIs, HTML, CSS, Bootstrap
Databases	MongoDB, MySQL
Blockchain	SHA-256 hashing, Chain validation, Web3 concepts
Tools	Git, GitHub, VS Code, PyCharm, Google Colab, IntelliJ IDEA

MEMBERSHIPS & ACTIVITIES

IEEE	Member – Institute of Electrical and Electronics Engineers
ISEC	Member – Information Systems and Engineering Community
Web3 / Open Source	Active contributor to open-source Web3 projects and blockchain community bounties since 2021

SOFT SKILLS & INTERESTS

Soft Skills	Problem Solving, Critical Thinking, Teamwork, Time Management, Leadership
Interests	Chess, Guitar, Swimming
